RE: 341 East Ohio Street Site Work Plan - SIS Project No. 1-25585-XG, Correspondence
No. 004

Dear Mr. Micke:

USEPA provided comments dated July 11, 2001 to the above-referenced document. Your comment number 17 asked whether a truck scale to weigh shipping containers would be available on site. In our response dated July 26, 2001, we indicated a portable scale would be available on site.

By this letter we are revising that comment response. Throughout the duration of the off-site shipment of soils, representative containers will be weighed at a certified fixed scale facility enroute between the site and the railyard in Blue Island, Illinois. Those weights will be used to develop an average weight for all containers shipped. No portable scale will be present on site.

This revision has been discussed with Kerr-McGee and they are in agreement with the proposed use of the fixed scale facility.

Please call with any comments to this change.

Regards,

STS CONSULTANTS, LTD.
